

Vanco Manufacturing Company, Inc.

(Jan-2001)

All models have dual ball bearings on the nosecone of the piston for better stability and all models have a safety-flo control valve. We also offer reducer liners for the 1 1/16" and larger feeders. All models come with a solid pusher bar to push the bars up to the collet or chuck leaving a minimal drop off. We make an optional rotating cone pusher for the 3/4" and larger feeds which gives a smoother feed and less noise. Another option for all feeds is a bar end indicator switch (interface) that sends a signal at the end of the stroke.

Model	Description	Net Price
658-AX	Feeds 6' bars up to 5/8" in diameter	1595.00
1258-AX	Feeds 12' bars up to 5/8" in diameter	1695.00
634-AX	Feeds 6' bars up to 3/4" in diameter	1645.00
1234-AX	Feeds 12' bars up to 3/4" in diameter	1745.00
601-AX	Feeds 6' bars up to 1 1/16" in diameter	1595.00
1201-AX	Feeds 12' bars up to 1 1/16 in diameter	1695.00
614-AX	Feeds 6' bars up to 1 1/4" in diameter	2095.00
1214-AX	Feeds 12' bars up to 1 1/4" in diameter	2195.00
615-AX	Feeds 6' bars up to 1 5/8" in diameter	2095.00
1215-AX	Feeds 12' bars up to 1 5/8" in diameter	2195.00
200-B6	Feeds 6' bars up to 2" in diameter	3695.00
200-B 12	Feeds 12' bars up to 2" in diameter	3795.00

Options: Reducer liner for AX models: 6' reducer @ \$750.00; 12' reducer @ \$800.00
Reducer liner for B models: 6' reducer @ \$800.00; 12' reducer @ \$850.00

Rotating Cone Pusher for 3/4" feeder @ \$175.00; 1 1/16" @ \$195.00; 1 5/8" @ \$225.00
End of bar Interface switch (installed) \$275.00

2 Hooks on pedestal for 1 1/16 feeders and smaller \$100.00
